Subject: Border 2020 grant amendment

Hello Christine,

I have been working with ICAPCD and the City of Mexicali on a work plan to improve air quality in the Imperial-Mexicali border region. As part of this work plan, education and awareness is one of the key priorities. We are grateful for the funds EPA has been providing for the winter "Ambientalize" media campaign in the Valley and the District and the City of Mexicali would really like to expand this campaign to educate people on the negative health effects of open burning. I believe that the grant would need to be amended to accommodate this addition and I think funds are available from the winter campaign to help out with this new campaign. I have been informed that Jeremy Bauer will not be going back to his previous role and to contact you regarding any border issues for now.

Can you please let me know if and when we can meet to discuss this amendment? I think the City of Mexicali and ICAPCD were hoping to have the new campaign aired by April/May so this would be a quick turnaround.

Any help you can lend would be appreciated. Thanks and have a great day!
